

Fire, Building & Life Safety Division		
FIRE ACCESS SIGN SPECIFICATIONS	PAGE 1 of 1	Revised: 10/1/2007
Category: Construction	Code Reference: 2006 IFC Section 1410.3	

PURPOSE

The purpose of this regulation is to provide detailed requirements for sign installation required on fire department access roads to reduce delays in emergency response.

REGULATION

SIGN REGULATION

- The sign shall be a minimum of 4' x 4'.
- Constructed of weather resistant material (e.g., ½" MDO plywood, aluminum or similar material).
- An approved sign shall be posted at all entrances to the construction site. The sign shall be posted at least 10 feet, but no more than 20 feet from the public right-a-way.
- The sign shall be installed so that the bottom of the sign is at least 7 feet above grade.
- The sign shall have a white background.
- Lettering shall be red and be at least 4" high with ¾" brush stroke.
- All lettering shall be visible and unobstructed by posts, vegetation, open gates, etc.

FRONT OF SIGN

The front of the sign shall state **FIRE ACCESS** or something similar, include the name of the construction project and the physical street address as follows:

FIRE ACCESS
(name of construction project)
(physical street address)

BACK OF SIGN

The back of the sign shall have the name of the project superintendent and a 24-hour phone number for the project superintendent as follows:

(name of project superintendent)
(24-hour phone number of project superintendent)

MULTI-TENANT CONSTRUCTION SIGNS

The Goodyear Fire Department may require additional signage be posted to identify fire access to multi-tenant construction sites. An example is two warehouse buildings constructed simultaneously by two different contractors. When applicable, contact the Goodyear Fire Department at (623) 882-7174 for signage requirements.
